Residential Organization

The Right Recipe: Organizing Your Kitchen and Pantry

Does your kitchen look like Chaos Central, where the mess gets messier and preparing meals is overwhelming? We can help your kitchen regain its place as the workable, welcoming hub of your home's busy activities.

While we can't control the hive of activity in your kitchen, we can create savvy storage spaces that will optimize your productivity. For example, we can:

- Organize silverware, dishware, and glassware at optimal locations;
- Organize drawers so that so you can easily find utensils and other contents;
- Arrange cabinets to maximize their usefulness; and
- Make gadgets you haven't used in years either usable or donate-able!

Also, we can ensure that the contents of your refrigerator and pantry are fresh and usable. We can organize these spaces using the latest in food storage systems – products that last forever and won't melt in your dishwasher or microwave. Imagine being able to see exactly what you have on hand so you can use it while it's fresh and tasty!

Caverns of Clutter: Organizing Garages, Attics, and Basements

Do you park on the street because your garage is packed? Avoid your attic because it's full of clutter? Bypass your basement because it's messy and muddled? Wouldn't it be nice to see what you have stored in these spaces and reach items easily? That's where we can help.

We can view your possessions objectively, which helps us be rigorous in de-cluttering these caverns of clutter. With our maxim of "Use It or Lose It," we'll help you maximize your storage space, keeping only the items you really need and want for the future. Here's what we do:

- Decide what to sell, what to donate, and what to keep;
- Suggest (or buy for you) usable, workable containers that categorize your belongings;
- Label and arrange containers; and
- Set up a logical organizational system so that you can put decorations, luggage, or keepsake treasures in the same place from year to year.

Note: Because most attics, basements, and garages are not air-conditioned or heated, we organize these areas during temperature-friendly times of the year.

Order a la Carte: Additional At-Home Services

We recognize that your home environment reflects your unique family and lifestyle and that you may need services that do not fit traditional categories.

We can help with "big picture" thinking, such as goal setting, clutter control, and space planning. We can also handle "little picture" jobs that you just need to get done; for example, we can:

- Straighten and spruce up playrooms and children's rooms;
- Create or reorganize craft centers, sewing rooms, and gift wrap stations;
- Sort and systematize cabinets and closets;
- Organize minivans;
- Enhance outdoor porches and decks for optimal enjoyment and use; and
- Organize and preserve photograph or keepsake collections.

What's your special project? Whether it's big or small, we aim to free you up so you can better enjoy your family, your home, your work, your life. [Give us a call and let us talk about ways we may be able to help.](#)

Light up Your Life: Lighting Your Home Effectively

The thoughtful use of lighting can greatly enhance your home. The right lighting can create an elegant ambiance in one room, showcase artwork in another, even make tasks easier to complete in a workspace, such as an office, sewing room, or woodshop.

We cannot stress this area enough: In almost every scenario, improvements to your lighting will add considerably to the livability or workability – even play-ability – of your inside or outside space.
